PROFILE SUMMARY

Web Developer focused on front-end development, with experience building responsive, user-friendly websites and web applications. Skilled in HTML, CSS, JavaScript, React, TypeScript, Tailwind CSS, Figma, and Framer. Passionate about creating intuitive user experiences, solving real-world problems, and building functional digital products using modern web technologies.

EXPERIENCE

NotZero Academy **September 2026 – Current**

BACKEND DEVELOPMENT

- Introduced to server-side development using Node.js and TypeScript, including asynchronous programming and classes.
- Developed HTTP servers using Node.js's built-in HTTP module to handle requests and responses.
- Built server-side applications and REST APIs using Express.js for task management, event management, and bookings.
- Practiced request validation and error handling using Zod while developing a Bookstore API.
- Project I have worked on: Student Management Server, ,Event and Bookings Server , and Book Store Server .

REACT March **2026 – April 2026**

- Introduced to React.js, JSX, and component-based development.
- Learned to create reusable components for building user interfaces.
- Practiced fetching and displaying API data in React applications.
- Gained experience styling responsive interfaces with Tailwind CSS.
- Project I built during this training: React-APP and Countries APP

JAVASCIPT **August 2025 – December 2025**

- Learned JavaScript fundamentals, including variables, data types, functions, and control flow.
- Worked with arrays, objects, loops, modern ES6+ features, and array methods.
- Worked with asynchronous JavaScript, promises, and Fetch API.
- Debugged JavaScript errors and improved application functionality.
- Project I built during this training: Mapty, and Forkify.

HTML & CSS **March 2025 – May 2025**

- Learned semantic HTML and webpage structure.
- Developed responsive layouts using CSS, Flexbox, and Grid.
- Practiced typography, colors, spacing, and element positioning.
- Built and styled website interfaces from design references.

- Project I built during this training: Coffie — GitHub .

SKILLS

Technical Skills

• FRONTEND STACK - 1+ years: HTML, CSS, JavaScript, Typescript, React, Tailwind CSS.
• BACKEND STACK – 2+ months: Express, Node.js, HTTP server.
• UI/UX – 1+ years: Framer, Figma.
• Infrastructure: - 1+ years: Git, GitHub, Chrome DevTools, Thunder Client, Postman, REST-API.
• Programming Paradigm - 1+ years: Data Structure, Algorithms, Functional Programming, Object Oriented Programming.

Soft Skills

Communication, Collaboration, Scrum, Empathy, Decision making, and Management.

INTERESTS

- Startups, Artificial Intelligence, AI Automation.

LANGUAGES

- English (fluent) |Yoruba (native)

EDUCATION

Ladoke Akintola University of Technology (LAUTECH), Nigeria. **March 2024 – Present**
Bachelor Of Science (B.Sc.) Computer Science
